---

Thanks for doing that Colleen. Please take some pictures for future reference. And thanks again Jeff and EPA for the very valuable and informative support!

Yes! I'd like to come by tomorrow morning sometime before lunch. I'll look for you when I get there. Thanks for the offer!

Thanks---

**Colleen**

James/Colleen,

FYI: EPA will be finishing our removal action and be completely off Pillon property Thursday or Friday, August 8 or 9. As expected, there will be some areas of known/suspected contamination remaining that are inaccessible to us due to surface obstructions (buses, structures, inoperable/immoveable heavy equipment). I believe these areas represent a very small amount of total soil considering the massive amount of solid waste that is currently on site and EPA may be able to help out once state and/or county authorities begin removal of the solid waste.

It may be beneficial to you to visit the site before we demobilize to take a look around and I can show you the location of those known/suspected areas. Of course there will be a report generated sometime in the next few months that also will depict the remaining areas. Let me know if you are interested in a site visit. I also have monitoring well keys to give to you (and copies to give to Ecology, as well).
